Long Elm Wood Library Table Dining Table With 14 Drawers, China circa 1880

The classic lines of this elm wood library table are well balanced by the 6 drawers along each side and single drawer on each end, for a total of 14 drawers.

Chinese design includes a "floating panel" top, allowing for the central panel to expand and contract with humidity with no damage to the dining table.

Floor to skirt height is 25" with an open space of 35" wide between the legs.

Restored, strong and stable. All drawers function with brass pull.

Any scratches, cracks, dings, stains (see photo of top) or age related separation are reflective of age and do not detract from the beauty nor function of this stunning table. Please refer to professional photos for clear understanding of color, condition and details; photo lighting, individual monitor display and home lighting may all impact how item is viewed.
