19th Century Large Black Chest of Five Drawers from Denmark

Large black pine chest of five drawers with turned columns flanking the inset upper large two drawers.

The four large drawers open with two brass pulls on each. The 5th topmost, more narrow drawer opens with a key used as pull only.

Restored, later professionally painted in layered shades of black and lightly distressed to fit the age and grace of this large chest of drawers.

Built in two sections, the upper case of 5 drawers rests on a base with scalloped skirt and feet.

All scratches, cracks (see top and sides), dings, and age-related separation (seen in the drawer bottoms) are reflective of age and do not detract from the beauty nor function of this large dresser.

Please refer to professional photos for clear understanding of color, condition, and details; photo lighting, individual monitor display and home lighting all impact how item is viewed. Photos are part of item description, please ask questions or request additional photos of specific areas if needed.
